Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

a classification
system laid down in
Regulation (EU)
2020/852,
establishing a list of
environmentally
sustainable
economic activities.
That Regulation
does not include a
list of socially
sustainable
economic activities.
Sustainable

investments with an

environmental objective might be

aligned with the

Taxonomy or not.

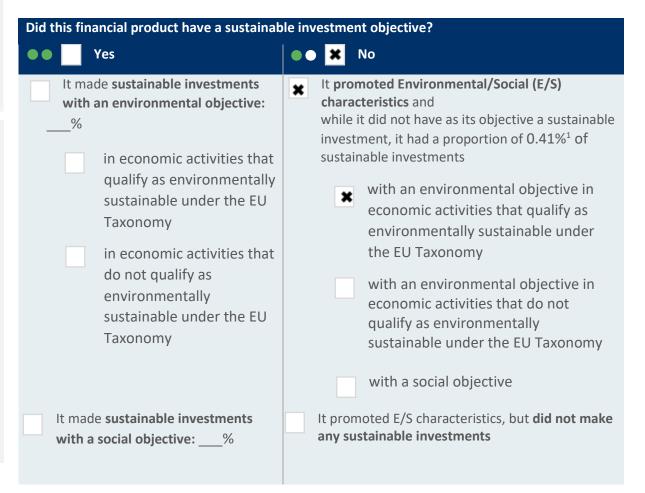

The **EU Taxonomy** is

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Segregated Account 27

Legal entity identifier:

# Environmental and/or social characteristics

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Portfolio commits to promote environmental and social characteristics by favouring investment in issuers whose business activities and/or conduct take an appropriate and responsible approach to ESG. This is achieved by implementing environmental, social and governance (ESG) integration (via the assessment of issuers based on a proprietary ESG risk rating methodology and setting a minimum threshold for investment eligibility of an issuer), ESG engagement (where appropriate to ensure the issuers continues to meet the required environmental and/or social characteristics being promoted) and

 $<sup>^{1}</sup>$  This figure relates to portfolio taxonomy alignment using the turnover basis. Report publication date: 25/03/25

ESG screening (by excluding issuers from investment due to their involvement in controversial activities and/or poor ESG conduct).

During the reference period, on 23<sup>rd</sup> October 2024, the Portfolio held 4% NAV, United States Treasury Bill. This restriction did not flag within Charles River due to the immediate issuer United States Treasury Bill not being captured in the client provided Restricted List, with only United States Treasury Note excluded, per the client provided Restricted List. The coding of the client provided Restricted List in Charles River was immediately readjusted and tested, to include all United States Bills and Notes issuers, and the position was closed on 24<sup>th</sup> October 2024.

### How did the sustainability indicators perform?

As of 31st December 2024, 94.59% of the Portfolio's total assets were invested in fixed income securities aligned with the E/S characteristics promoted by the Portfolio ("In Scope Securities").

The sustainability indicators used to assess, measure and monitor the ESG characteristics of the Portfolio are as follows:

- I. 100% of In Scope Securities are covered by the Investment Manager's ESG evaluation.
- 96% of in scope securities are compliant and not in active breach of the client's Restricted Lists.

### ...and compared to previous periods?

Not applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable, the Portfolio does not claim to make investments with a sustainable objective in the SFDR pre-contractual disclosure.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable, the Sub-Fund does not claim to make investments with a sustainable objective in the SFDR pre-contractual disclosure.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable, the Sub-Fund does not claim to make investments with a sustainable objective in the SFDR pre-contractual disclosure.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Not applicable, the Sub-Fund does not claim to make investments with a sustainable objective in the SFDR pre-contractual disclosure.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

# PAI indicators considered by the Portfolio during the reporting year:

	Adverse sustainability indicator	Metric	Impact	Explanation			
	ENVIRONMENT	ΓAL					
CORPORATE	GHG Emissions	Scope 1 GHG emissions [tCO <sub>2</sub> e]	4,495.6	The Sub-Fund considers scope 1, 2, 3 and total GHG emissions, carbon footprint, and GHG intensity PAI metrics. The consideration is by escalation with investee companies with high levels of scope 1 GHG emissions, scope 2 GHG emissions, estimate scope 3 GHG emissions,			
		Scope 2 GHG emissions [tCO <sub>2</sub> e]	2,064.0	and total GHG emissions relative to companies operating in the same NACE sector and regional market (developed/emerging, as defined by the World Bank). Escalations can take the form of additional due diligence, engagement, collaborative initiatives, and/or exit, as			
		Scope 3 GHG emissions [tCO <sub>2</sub> e]	44,412.1	determined by the Investment Manager. Monitoring and evaluation of escalation actions and their outcoms are taken into account in terms of the ongoing eligibility of the investee companies, and/or investment positioning.			
	Carbon footprint	Carbon footprint [tCO <sub>2</sub> e per EUR million invested]	302.7	During the reference period, the Investment Manager had access carbon related data on investee companies, and enabled portfolio analytics and tools sourced from the third party vendor. These versions are access to the contract of the cont			
	GHG intensity of investee companies	GHG intensity of investee companies [tCO <sub>2</sub> e / EUR million sales]	729.3	used to support assessment of climate-related practices of investee companies within the Sub-Fund, and inform on the identification of areas for potential research, due diligence, engagement, as determined by the Investment Manager.  Where relevant, feasible and in-line with the investment objective, the Investment Manager conducts engagement with investee companies on climate-related matters, either to inform and/or to promote better practices, which range from encouraging enhanced disclosure, to			
				better mitigation of GHG emissions.			

Adverse sustainability Metric indicator		Impact	Explanation  The Sub-Fund considers this PAI metric by taking escalation actions with investee companies in high impact sectors (in NACE sector code of A, B, C, D, E, F, G, H, or L) without carbon emissions reduction initiatives aimed at aliging to the Paris Agreemenmt. Escalations can			
Investments in companies without carbon emission reduction initiatives	Share of investments in investee companies without carbon reduction initiatives aimed at aligning with the Paris Agreement [% portfolio weight]	39.7%	with investee companies in high impact sectors (in NACE sector code of A, B, C, D, E, F, G, H, or L) without carbon emissions reduction initiatives aimed at aliging to the Paris Agreemenmt. Escalations can take the form of additional due diligence, engagement, proxy voting, collaborative initiatives, and/or exit, as determined by the Investment Manager. Monitoring and evaluation of escalation actions and their outcomes will be taken into account in terms of the ongoing eligibility of the investee companies, and/or investment positioning.  During the reference period, the Investment Manager had access to carbon related data on investee companies, and enabled portfolio level analytics and tools sourced from the third party vendor. These were used to support assessment of climate-related practices of investee companies within the Sub-Fund, and inform on the identification of areas for potential research, due diligence, engagement, as determined by the Investment Manager.  relevant, feasible and in-line with the investment objective, the Investment Manager conducts engagement is prioritized based on the extent to which investee companies in high impact sectors (in NACE sector code of A, B, C, D, E, F, G, H, or L) are without carbon emissions reduction initiatives where these are considered material.  The Sub-Fund considers this PAI metric by escalating with investee companies that are active in the fossil fuel related sector depending on the emissions profile of their business activities depending on a specific type of involvement. Escalations can take the form of additional due diligence, engagement, collaborative initiatives, and/or exit, as determined by the Investment Manager. Monitoring and evaluation of escalation actions and their outcomes will be taken into account in terms of the ongoing eligibility of the investee companies, and/or investment Manager conducts engagement with investee companies on climate-related matters where they fall into these sectors.			
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector [% portfolio weight]	6.2%	companies that are active in the fossil fuel related sector depending on the emissions profile of their business activities depending on a specific type of involvement. Escalations can take the form of additional due diligence, engagement, collaborative initiatives, and/or exit, as determined by the Investment Manager. Monitoring and evaluation of escalation actions and their outcomes will be taken into account in terms of the ongoing eligibility of the investee companies, and/or investment positioning.  Where relevant, feasible and in-line with the investment objective, the Investment Manager conducts engagement with investee companies			
SOCIAL						
Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.0%	The Sub-Fund minimises this PAI metric by excluding investee companies with exposure to controversial weapons within (focus on manufacturing), and beyond the scope of the PAI (by including other controversial weapons like nuclear).  During the reference period, the Investment Manager had access to data on investee companies and their statuses with regards to controversial weapons inovlvement, sourced from the third party vendor. These are used to support assessment of involvement of investee companies within the Sub-Fund.			

Adverse sustainability indicator	Metric	Impact	Explanation		
Violations of UN Global Compact principles and OECD Guidelines for Multinationals	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises [% portfolio weight]	0.0%	Where relevant, feasible and in-line with the investment objective, the Investment Manager conducts engagement with investee companies based on the extent to which the investee companies faced meaningful ESG controversies or may be potentially in scope of being in violation of norms such as the UN Global Compact.  The Sub-Fund considers this PAI metric by taking escalation actions with investee companies that do not have anti-corruption and anti-bribery policies. Escalations can take the form of additional due diligence, engagement, collaborative initiatives, and/or exit, as determined by the Investment Manager. Monitoring and evaluation of escalation actions and their outcomes will be taken into account in terms of the ongoing eligibility of the investee companies, and/or investment positioning.  During the reference period, the Investment Manager had access to data on investee companies bribery and corruption practices, sourced from the third party vendor. These are used to support assessment of the performance of investee companies on these parameters within the Sub-Fund, and inform on the identification of areas for potential research, due diligence, engagement, as determined by the Investment Manager.		
Lack of anti- corruption and anti-bribery policies	Share of investments in entities without policies on anticorruption and antibribery consistent with the United Nations Convention against Corruption [% portfolio weight]	2.2%	with investee companies that do not have anti-corruption and anti-bribery policies. Escalations can take the form of additional due diligence, engagement, collaborative initiatives, and/or exit, as determined by the Investment Manager. Monitoring and evaluation of escalation actions and their outcomes will be taken into account in terms of the ongoing eligibility of the investee companies, and/or investment positioning.  During the reference period, the Investment Manager had access to data on investee companies bribery and corruption practices, sourced from the third party vendor. These are used to support assessment of the performance of investee companies on these parameters within the Sub-Fund, and inform on the identification of areas for potential research, due diligence, engagement, as determined by the Investment Manager.		
			Where relevant, feasible and in-line with the investment objective, the Investment Manager conducts engagement with investee companies based on the extent to which lacking such policies can be linked to ESG performance issues.		

As of 31st December 2024. The Investment Manager monitors and evaluates the PAI indicators and metrics indicated. Because reporting on many PAI indicators is currently voluntary for many issuers, the availability of data on some indicators is limited. Therefore, the integration of PAI indicators is conducted on a best-efforts basis. In addition, some assets may be excluded from the calculation of PAI indicators due to, but not limited to, limitations in data availability and/or inapplicability of methodologies to certain asset types. Other securities may not be included where there are gaps in data or methodological challenges that cannot be addressed at this time. As data availability improves, it is expected that PAI indicators will cover a greater portion of the Portfolio's investable universe and therefore allow for better insight in the adverse impacts caused by investee entities. Further information is available upon request.

### What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1st January 2024 – 31st December 2024

Largest investments	Sector	% Assets	Country
Bundesrepublik Deutschland Bundesanleihe	Sovereign	2.29%	Germany
Citadel Finance LLC	Financial Services	1.29%	United States
Amazon.com Inc	Consumer Discretionary Distribution & Retail	1.18%	United States
Bundesschatzanweisungen	Sovereign	1.09%	Germany
Foundry JV Holdco LLC	Financial Services	1.04%	United States
KBC Group NV	Banks	1.00%	Belgium
Avolon Holdings Funding Ltd	Financial Services	0.99%	Ireland
Mizuho Financial Group Inc	Banks	0.92%	Japan
Kia Corp	Automobiles & Components	0.91%	South Korea
Apple Inc	Technology Hardware & Equipment	0.83%	United States
Hyundai Capital America	Automobiles & Components	0.79%	United States
Corp Nacional del Cobre de Chile	Materials	0.75%	Chile
Citigroup Inc	Banks	0.75%	United States
Wells Fargo & Co	Banks	0.74%	United States
Avolon Holdings Funding Ltd	Financial Services	0.68%	Ireland

As of 31<sup>st</sup> December 2024. This data has been compiled based on investment holding weights on the last business of each month and averaged for the reference period. Classification of securities including sector and country are determined as at the last day of the reference period.

### What was the proportion of sustainability-related investments?

The Portfolio invested 100% of its NAV (excluding cash, cash equivalents, hedging instruments or other securities not designed to provide equity exposure) in companies aligned with the E/S characteristics promoted by the Portfolio (#1).

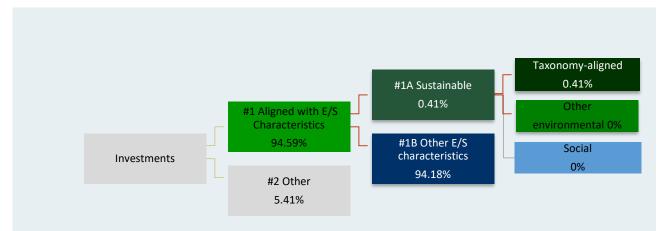

# Asset allocation describes the share of investments in specific assets.

### What was the asset allocation?

94.59% was invested in instruments aligned with the E/S characteristics of the Portfolio (#1).

0.41% was invested in taxonomy-aligned instruments. These investments were coincidental. The Sub-Fund did not have as its objective a sustainable investment.<sup>2</sup>

5.41% was held in cash, cash equivalents, short-term bank certificates and Money Market Instruments used for the purposes of capital preservation and which do not follow any minimum environmental or social safeguards (#2).

**#1Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

8

Cash	Cash	5.73%

As of 31<sup>st</sup> December 2024. This data has been compiled based on sector weights on the last business day of each month and averaged for the reference period.

As at 31<sup>st</sup> December 2024, the proportion involved in sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels was 6.2%.

# To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

	Turnover	CapEx	OpEx
Climate Change Mitigation	0.37%	0.60%	0.19%
Climate Change Adaptation	0.00%	0.00%	-
Sustainable Use and Protection of Water and Marine Resources	-	-	-
Transition to a circular economy	-	-	-
Pollution Prevention and Control	0.04%	0.03%	0.04%
Protection and Restoration of Biodiversity and Ecosystems	-	-	-
Total Alignment	0.41%	0.63%	0.23%

As of 31<sup>st</sup> December 2024. In some cases, underlying component metrics may not equal totals due to timing of data collection and updates by third-party vendor. What is presented here is exclusively sourced from third-party vendor. Further information is available upon request.

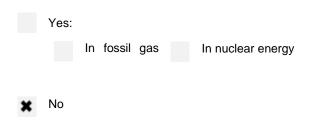

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

# Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

# Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best

performance.

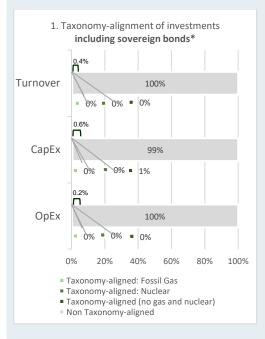

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>3</sup>?

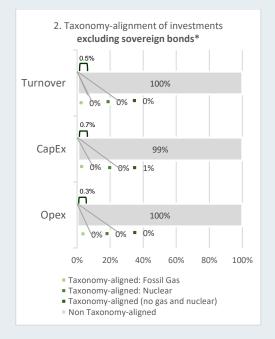

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
   expenditure
   (CapEx) showing
   the green
   investments made
   by investee
   companies, e.g. for
   a transition to a
   green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>&</sup>lt;sup>3</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# What was the share of investments made in transitional and enabling activities? Transitional activities

	Turnover	CapEx	OpEx
Climate Change Mitigation	0.03%	0.02%	-
Climate Change Adaptation	-	-	-
Total Alignment	0.03%	0.02%	-

#### **Enabling activities**

	Turnover	CapEx	OpEx
Climate Change Mitigation	0.20%	0.43%	0.19%
Climate Change Adaptation	-	-	-
Sustainable Use and Protection of Water and Marine Resources	-	-	-
Transition to a circular economy	-	-	-
Pollution Prevention and Control	0.04%	0.03%	0.04%
Protection and Restoration of Biodiversity and Ecosystems	-	-	-
Total Alignment	0.24%	0.47%	0.23%

As of 31st December 2024.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

Sustainable

investments with an

account the criteria for environmentally

environmental objective that **do** 

not take into

sustainable economic activities under Regulation

(EU) 2020/852.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the Sub-Fund does not claim to make investments with a sustainable objective in the SFDR pre-contractual disclosure.

The Sub-Fund does not have an environmental sustainable investements framework that is not aligned with the EU Taxonomy.

### What was the share of socially sustainable investments?

Not applicable, he Sub-Fund does not claim to make investments with a sustainable objective in the SFDR pre-contractual disclosure.

The Sub-Fund does not have a social sustainable investements framework.

The Gas I alia accompanie have a coolar cactamasic investorile hamone

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Portfolio held certain instruments which do not contribute directly to the E/S characteristics promoted by the Portfolio such as Cash, short-term bank certificates and Money Market Instruments.

Such instruments were used for the purposes of capital preservation and do not follow any minimum environmental or social safeguards.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In line with the ESG screening process, investment restrictions were implemented and revised as part of the regular cycle of updates. Whilst not binding, ESG engagement with issuers and other key stakeholders on environmental and/or social issues occurred and prioritized using a risk-based approach. During the reference period the Investment Manager conducted various engagement activities to either better understand the management of specific ESG risks, or to encourage improved ESG management practices to mitigate such risks.

During the reference period, on 23<sup>rd</sup> October 2024, the Portfolio held 4% NAV, United States Treasury Bill. This restriction did not flag within Charles River due to the immediate issuer United States Treasury Bill not being captured in the client provided Restricted List, with only United States Treasury Note excluded, per the client provided Restricted List. The coding of the client provided Restricted List in Charles River was immediately readjusted and tested, to include all United States Bills and Notes issuers, and the position was closed on 24<sup>th</sup> October 2024.
